REFLECTION

- Reflection is a *metacognitive process* that creates greater understanding of self and situations to inform future action.
- A set of abilities and skills, to indicate the taking of a critical stance, an orientation to problem solving or state of mind.
- Reflection is an activity in which people recapture their experience, think about it and evaluate.

REC

How to implement Reflective Practice

Jaya Nerali's screen ... for teaching reflection at all levels of medical education. Med Teach. 2010;31-6.

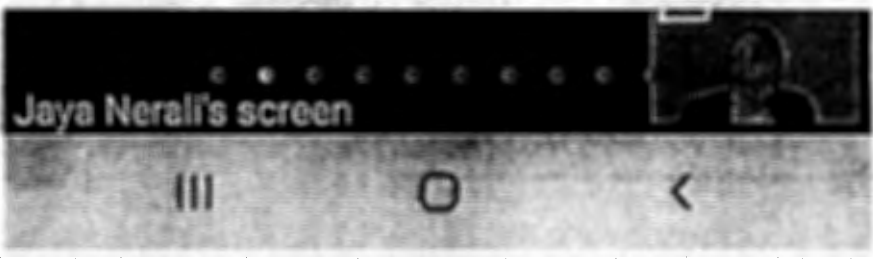

REC

Why Reflection???

- We had the experience but missed the meaning!!!
- Reflection is about getting the meaning from everyday experiences
- To convert short term memory to long term.
 - For better performance
 - You will not lose resources and waste time
 - You will be able to choose the best solution for your difficult situations
 - To develop your own way of management
